ATU?

Geo-hazards Unit long Dipatmen blong Meteo mo Geo-hazard nao oli responsible blong stap monitoring ol volkeno blong Vanuatu. Long sam long ol volkeno blong Vanuatu, ikat ol stasen we ikat ol masin istap long hem blong rikodem ol muvmen blong graon taem ikat wan hedkwék. Ol stesen ta oli sending ol signal ta oli kam long men haos long Vila blong oli save lukluk gud mo long hem mo afta bae oli save sendem aot infomesen ta iko aot long pablik blong talem sapos aktiviti blong volkeno hemi kam antap o nogat.

Sanbis blong volkeno hemi wan komon denja long fulap island, we ikat volkeno long hem olsem Tanna mo Lopevi. Taem volkeno is sakem sanbis, wind I kaem mo sakem long ol harafala ples. Ol sanbis ia oli smol tumas yumi no save luk, mekem se taem man I brit, I save pulum ol smol sanbish ia tu I ko insaed mo mekem hem I kasem sotwin or ol nara problem lo lang blo hem. Sanbis' blong volkeno I save spolem ol haus, garen mo helt blo ol man.

Magma hemi save fulap I kam antap insaed long volkeno, mo ron aot iko long ol nara eria kolosap mo distroyem evri samting we I stap long rod blong hem. Long 1951, lava hemi ron aot long volkeno blong Ambrym mo mekem fulap man oli ronwe mo ko hiv long ol narafala aelan kolosap.

WANEM NAO VOLKENO WONING SIS-
TEM WE VANUATU I USUM?

Vanuatu i usum wan system we oli kolen
Vanuatu Volkeno Alet Level we hemi stat
long level 0 iko kasem-level 5. Ikat two grup
blong ol volkeno. Wanwan long ol level ia
hemi stap representem ol difren kain hazad or
denja we ol man long eria ia oli save fesem
taem aktiviti blong volkeno ikam antap. Taem
kala long ol level ia ikam mo dak, hemi stap
minim se aktiviti istap kam antap mo. Mekem
sua se yu save wanem blong mekem long ol
difren level ia.

This table shows the description of Volcano Hazard Alert Level (VHAL).	
VHAL 1	Profoundly low level of threat posed. Hazard Level is very low. Very low volcanic hazard. Minor volcanic activity.
VHAL 2	Insufficient monitoring to make assessment. Signs of activity.
VHAL 3	Increased activity, danger now exists. Confirmation of escalating. Minor eruptions and danger need to order.
VHAL 4	Moderate eruptions, danger close to the volcano vent, within parts of Volcanic Hazards Map Red Zone. Moderate to large eruption, danger to some near-time and along main stream valley.
