FUND

Green Climate Fund Accredited Entities

WITH VANUATU/PACIFIC EXPERIENCE

Green Climate Fund Accredited Entities

WITH VANUATU/PACIFIC EXPERIENCE

The Green Climate Fund works through a wide range of Accredited Entities to channel its resources to projects and programmes. Such entities have different characteristics. They can be private or public, non-governmental, sub-national, national, regional or international, as long as they meet the standards of the Fund. Accredited Entities carry out a range of activities that usually include the development of funding proposals and the management and monitoring of projects and programmes. Countries may access GCF resources through multiple entities simultaneously.

This document contains a list of organisations with known experience working in Vanuatu or the South Pacific. Finding an Accredited Entity that is willing to submit an application on the project proponent's behalf is **required** as part of the application process.

CONTENTS

Introduction to Accredited Entities of the Green Climate Fund.....	1
Asian Development Bank (ADB)	2
Agence Française de Développement (AFD)	3
Conservation International Foundation (CI)	4
European Investment Bank (EIB).....	5
Food and Agriculture Organization of the United Nations (FAO).....	6
Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH	7
International Fund for Agricultural Development (IFAD).....	8
International Union for Conservation of Nature (IUCN)	9
Japan International Cooperation Agency (JICA)	10
Kreditanstalt für Wiederaufbau (KfW)	11
Micronesia Conservation Trust (MCT)	12
Secretariat of the Pacific Regional Environment Programme (SPREP)	13
United Nations Development Programme (UNDP).....	14
United Nations Environment Programme (UNEP)	15
World Food Programme (WFP)	16
World Meteorological Organization (WMO)	17
World Bank	18
World Wildlife Fund, Inc (WWF)	19

ACCREDITED ENTITIES OF THE GREEN CLIMATE FUND

The Green Climate Fund works through a wide range of institutions to finance projects and programmes. To access funding, these institutions will go through a process of “[accreditation](#),” designed to:

- Assess whether they are capable of strong financial management and meet fiduciary standards
- Able to safeguarding funded projects and programmes against any unforeseen environmental or social harm
- Meet requirements of GCF Gender Policy

Figure 1: There are 15 international entities and 2 direct (regional) entities. Note that there are no direct (national) entities at present.

DEFINITIONS

Project Size Accreditation Categories

- Micro: up to US\$ 10 million
- Small: US\$ 10 - 50 million
- Medium: US\$ 50 - 250 million
- Large: above US\$ 250 million

Accreditation Categories:

- Lowest risk: category C or I3
- Medium risk: category B or I2
- High risk: category A or I1

1. ASIAN DEVELOPMENT BANK

Website: <http://www.adb.org>

Headquartered in: Philippines

6 ADB Avenue, Mandaluyong City
Metro Manila 1550
Tel: +63 2 632 4444
Fax: +63 2 636 2444

The Asia Development Bank (ADB) is an international organization whose main goal is to reduce poverty in Asia and the Pacific through environmentally sustainable growth. This goal is pursued through the provision of various forms of financial assistance to developing countries through loans, technical assistance, grants, guarantees and equity investments. ADB works in many areas to address climate change, however its main focus and expertise are in the following subject matter: clean energy, sustainable transport and urban development, land use and forests for carbon sequestration, climate resilient development, as well as strengthening related policies, governance and institutions. ADB intends to deploy financial resources from the GCF in public and private sector projects focused on mitigation (e.g. energy generation and access, energy efficiency, transport, buildings, cities, industries and appliances, land use/forestry, and institutional and regulatory systems); adaptation (e.g. enhancing livelihoods, health and well-being and food and water security, infrastructure and built environment, ecosystems and ecosystem services, climate information/ early warning systems, and awareness strengthening and climate risk reduction), and cross-cutting issues.

2. AGENCE FRANÇAISE DE DEVELOPPEMENT

Website: <http://www.afd.fr>

Headquartered in: France

5 Rue Roland Barthes
Paris 75 598 cedex 12
Tel: +33 1 53 44 31 31
Fax: +33 1 44 87 99 39

The Agence Française de Développement (AFD) is a public international financial institution established several decades ago. The mandate of AFD is to contribute to social and economic development through sustainable and inclusive growth, enhancing livelihoods and natural resource management. With operations in more than 90 developing countries across all regions, including least developed countries and small island developing states, AFD is actively engaged in climate change mitigation and adaptation actions across all sectors. AFD made a commitment of almost US\$3 billion to climate finance last year, employing a range of financial instruments. AFD has delivered projects and programmes in renewable energy, energy efficiency, public transport, disaster risk management in urban areas and water resources management, improving livelihoods and well-being, adaptive agriculture and forestry. AFD sought accreditation with the GCF to utilize its experience in project delivery by offering support to national priorities in climate resilient development pathways. AFD also seeks to promote direct access to climate finance by strengthening the institutional capacities of national and regional entities.

3. CONSERVATION INTERNATIONAL FOUNDATION

Website: <http://www.conservation.org>

Headquartered in: United States of America

2011 Crystal Drive, Suite 500

Arlington, Virginia 22202

Tel: +1 703 341 2400

Fax: +1 703 553 0654

The Conservation International Foundation (CI) is a non-profit organization that operates internationally in over 30 countries across six continents with a wide range of partners in order to empower societies to responsibly and sustainably care for nature for the well-being of humanity. It has built strong relationships with communities, governments, academia, foundations, civil-society organizations and the private sector in order to deliver innovative nature-based solutions for climate change mitigation and adaptation. In developing countries, it partners with the host country government institutions, research or academic institutions, as well as indigenous peoples' organizations. With global private corporations, CI has developed a track-record of improving the sustainability of business operations. Key activities include reducing deforestation, improving agricultural practices, protecting natural ecosystems to serve as carbon sinks, and developing standards for effective mitigation and adaptation activities. It has leveraged over US\$ 100 million for 'debt-for-nature' swaps and has raised over US\$ 30 million for a carbon fund. CI sought to scale up its impact on combating climate change by delivering more climate action on the ground, providing accessible and science-based tools for decision makers, and mobilizing a network of major corporations as well as ensuring the involvement of all stakeholders.

4. EUROPEAN INVESTMENT BANK

Website: <http://www.eib.org>

Headquartered in: Luxembourg

98 -100, Boulevard Konrad Adenauer

Luxembourg L-2950

Tel: +352 437922000

Fax: +352 437962000

The European Investment Bank (EIB) headquartered in Luxembourg, is an international financial entity whose main objective in developing countries is to provide finance and expertise for sound and sustainable investment projects, in both the private and the public sector, provide social and economic infrastructure, and address climate change, among others. EIB is currently operating in over 150 countries and has a mandate to operate in any developing country. Climate action is one of the top policy priorities for EIB, which integrates climate considerations across all its activities, in addition to financing climate mitigation and adaptation projects, thereby contributing to low-carbon and climate-resilient growth around the world and supporting the transition to a sustainable low-carbon future. EIB targets 25 per cent of its portfolio as climate action projects and programmes. In 2014, its total investment in climate action projects and programmes was more than US\$ 20 billion. Additionally, EIB regularly provides capacity-building support in many sectors and specific technical assistance focused on developing local skills to support project development and implementation, as a way of strengthening country ownership. EIB seeks to support the paradigm shift objective of the GCF by making use of its network of trusted partners in the public and private sectors and non-governmental organisations to optimize the collaborative work of EIB in tackling climate change, and would help to overcome investment hurdles, in particular those faced by the private sector.

7. INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT

Website: <https://www.ifad.org/>

Headquartered in: Italy

Via Paolo di Dono 44

Rome 00142

Tel: +39 06 54591

Fax: +39 06 504 3463

The International Fund for Agricultural Development (IFAD), is an international organization whose objective of to improve agricultural development and livelihoods in developing countries. Its projects and programmes are carried out in remote and environmentally fragile locations, including least developed countries and small island developing States. The IFAD assists vulnerable groups such as smallholder farmers, pastoralists, foresters, fishers and small-scale entrepreneurs in rural areas by providing, among others, access to weather information, disaster preparedness, social learning and technology transfer that enables farmers to feed growing populations and increase the climate resilience of rural farming systems.

8. INTERNATIONAL UNION FOR CONSERVATION OF NATURE

Website: <http://www.iucn.org/>

Headquartered in: Switzerland

Rue Mauverney, 28

Gland 1196

Tel: +41229990000

Fax: +41229990002

IUCN is a non-profit organization that operates internationally in over 150 countries with a wide range of members and partners, including States and government agencies, non-governmental organizations (NGOs), scientists and experts to find practical solutions to environment conservation and sustainable development challenges. It has a strong presence in countries in transition, least developed countries and small island developing States through its regional offices. Its overall programme of work focuses on valuing and conserving nature, ensuring effective and equitable governance of its use, and deploying nature-based solutions to global challenges such as climate change. IUCN does this by undertaking and supporting scientific research, managing and implementing field projects on the ground and bringing together various stakeholders to develop and improve policies, laws and best practices. Currently, IUCN has a project portfolio amounting to US\$ 330 million in grants. It is estimated that half of this portfolio addresses climate change adaptation issues, while 10 per cent contributes to climate change mitigation through greenhouse gas emission reductions. IUCN intends to add significant value to the GCF by implementing its mandate to build capacity, especially in relation to its national government and NGO members. IUCN also plans not only to work towards channelling funding from the GCF to recipient countries, but also to contribute to enhancing their capacity to ensure that they have direct access to multilateral funding.

10. KREDITANSTALT FÜR WIEDERAUFBAU

Website: <https://www.kfw.de/>

Headquartered in: Germany

Palmengartenstrasse 5-9

Frankfurt 60325

Tel: +49 69 7431 0

The Kreditanstalt für Wiederaufbau (KfW) is an international organization that works together with its partners in developing countries in order to identify projects/programmes which promote sustainable development. With a development mandate that receives funding from both public and private sector organizations, KfW's activities largely focus on climate change adaptation and mitigation activities. These activities include improving water supply, securing food provision, increasing energy efficiency, employing renewable energies and others. The climate finance activities of KfW include a range of financial instruments, including grants, loans, equity and guarantees. Building on its existing knowledge, experience and tools, KfW sought accreditation to the GCF in order to develop projects and programmes, including the targeted mobilization of private finance through risk mitigation mechanisms, and the setting up of project development facilities and structured investment funds. KfW sought accreditation in order to expand and develop additional adaptation projects and programmes focused on ecosystem-based adaptation, natural hazard early warning systems, climate risk insurances as well as urban flood protection infrastructure.

12. SECRETARIAT OF THE PACIFIC REGIONAL ENVIRONMENT PROGRAMME

Website: <http://www.sprep.org/>

Headquartered in: Samoa

P.O. Box 240

Apia

Tel: +685 21929

Fax: +685 20131

The Secretariat of the Pacific Regional Environment Programme (SPREP) is a regional entity based in Samoa focused on climate change and environmental issues affecting SIDS in the Pacific. SPREP supports action on climate change in the key areas of adaptation, mitigation, policy and science. Key activities include: assisting SIDS to integrate climate change considerations into national planning and development processes; supporting and building capacity at the national and subnational levels through technical training on meteorological services, cost benefit analyses, vulnerability assessments and monitoring and evaluation; providing support to coordinate integrated adaptation measures; and implementing mitigation activities such as renewable energy projects (solar and biomass). SPREP intends to build upon its current experience and to focus on integrated approaches to addressing climate change, disaster risks as well as ecosystem based adaptation projects and programmes in SIDS. By being accredited to the GCF, SPREP intends to apply GCF resources towards SIDS-focused adaptation and mitigation projects and programmes, as well as building national capacity in order to address climate change.

13. UNITED NATIONS DEVELOPMENT PROGRAMME

Website: <http://www.undp.org>

Headquartered in: United States of America

304 East 45th Street, FF-9th Floor
New York 10017

The United Nations Development Programme is an international organization with a strong global presence and mandate concentrated on development, with a focus on sustainable development, climate change and disaster resilience, and governance. UNDP works in partnership with entities, such as national governments, United Nations agencies, civil society organizations, and development banks, in order to support the coordinated delivery of financing to achieve transformational impact in the areas of mitigation and adaptation. Its work in adaptation covers all developing countries in all regions and includes a strong portfolio in least developed countries, small island developing states and African states. Adaptation activities include integrated climate change strategies, national adaptation plans, national planning and budgeting frameworks; cross-sectoral climate-resilient livelihoods; climate-resilient integrated water resource and coastal management; ecosystem-based adaptation; and climate-resilient energy and infrastructure. In mitigation, UNDP supports developing countries in order to create enabling environments for investment in mitigation technologies and land-uses at scale, with activities in: low-carbon energy access solutions (rural mini-grids, bio-energy and green charcoal supply chains), grid-connected renewables, energy efficient buildings and appliances, and reducing emissions from deforestation and forest degradation.

14. UNITED NATIONS ENVIRONMENT PROGRAMME

Website: <http://www.unep.org>

Headquartered in: Kenya

United Nations Avenue, Gigiri, P.O. Box 30552
Nairobi 00100
Tel: +254 20 7621234

The United Nations Environment Programme (UNEP) is an international entity whose mandate is to promote sustainable development and prudent use of the global environment. It assists many countries to achieve resilient, low-emission pathways through its flagship programmes in adaptation, forestry, energy efficiency and transition to sustainable development. Its key activities include promoting investment in clean technologies in order to reduce emissions, protecting biodiversity and ecosystems, alleviating poverty, and ecosystem-based adaptation in order to reduce human vulnerability and strengthen resilience to the impacts of climate change. It works with the financial communities to mobilize financial resources for investments in low carbon and climate resilient development; developing climate finance readiness and capacity-building; and undertaking policy and research analysis. The climate change portfolio of UNEP has a total volume of over US\$ 400 million. UNEP sought accreditation to the GCF in order to catalyse the use of ecosystem services to achieve a paradigm shift to resilient, green sustainable development by using its vast experience of providing green solutions in both climate change mitigation and adaptation.

15. WORLD FOOD PROGRAMME

Website: <http://www.wfp.org/>

Headquartered in: Italy

Via Cesare Giulio Viola 68
Rome 00148
Tel: +39 06 65131
Fax: +39 06 6590632

The World Food Programme (WFP) headquartered in Italy, is an international entity whose mandate is to fight hunger worldwide by supporting national, local and regional food security and nutrition plans and programmes. It has built strong relationships with international organizations, non-governmental organizations, civil society and the private sector to enable people, communities and countries to meet their own food needs. With respect to climate change, WFP plays a role both in helping governments and communities prepare and respond to shocks, as well as in reducing vulnerability and building lasting resilience. Approximately 40 per cent of WFP's operations include activities designed to reduce disaster risk, build resilience and help people adapt to climate change. In the last decade alone, 47 per cent of its operations included response to climate-related disasters amounting to a total cost of US\$ 23 billion. WFP sought accreditation to the GCF in order to contribute to furthering the objectives of the GCF by delivering further climate action in its projects/programmes, promoting results-based management and gender-sensitive programming, and strengthening national and subnational institutional systems to implement programmes.

16. WORLD METEOROLOGICAL ORGANIZATION

Website: <http://www.wmo.int>

Headquartered in: Switzerland

7bis, avenue de la Paix, case postale 2300
Geneva 1211
Tel: +41227308111
Fax: +41227308181

The World Meteorological Organization (WMO) headquartered in Switzerland, is an international entity focused on weather, climate and water. It provides a unique mechanism for the timely exchange of weather, climate and water data, information and products. Its core activity is to assist countries and national agencies to improve weather and air-quality forecasts, climate predictions, risk assessments, early warnings for extreme weather and climate events, and to provide a growing range of related services for the public and decision makers globally. In the context of climate change, WMO plays an important role in supporting adaptation to climate variability and change by linking science-based climate predictions and information with the management of climate-related risks and opportunities in major climate-sensitive sectors. WMO intends to strengthen its assistance to developing countries and small island developing States to enable them to achieve strategic impact in the areas of mitigation of and adaptation to climate change. WMO sought accreditation to the GCF in order to achieve maximum results in its projects and add value to the GCF portfolio as a whole by leveraging its know-how and expertise and by engaging in dialogue with its partners on GCF funding opportunities and requirements to ensure, through its assistance, that any related capacity gaps are addressed.

17. INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT AND INTERNATIONAL DEVELOPMENT ASSOCIATION

Website: <http://www.worldbank.org>

Headquartered in: United States of America

1818 H Street, NW

Washington, D.C. 20433

Tel: +1 202 473 1000

The International Bank for Reconstruction and Development and International Development Association (World Bank) is an international organization with a strong global presence and mandate to reduce poverty by promoting sustainable economic development. World Bank works in partnership with developing countries through national governments in order to support the coordinated delivery of its projects and programmes in various sectors and through the use of various financial instruments, including grants, loans and guarantees. Over the past few years, World Bank has provided over US\$ 30 billion in finance for climate change related activities globally. It is engaged in climate change mitigation across all sectors and regions. Its work in mitigation covers renewable energy generation, energy efficiency and access, forestry and sustainable transport projects and programmes. In addition, it has supported the least developed countries, small island developing States and other vulnerable countries in climate change adaptation by financing projects in disaster risk reduction and ecosystem services in sectors such as fisheries and water resources management. Bringing with it its experience in climate change mitigation and adaptation programming, and utilizing its knowledge and delivery infrastructure to enhance direct access to climate finance by developing countries, World Bank sought accreditation to the GCF.
