

SOCIAL NETWORK ANALYSIS REPORT

Part 2: Capacities of Climate Change and Disaster Risk Organizations acting in Vanuatu

Astrid Vachette¹

¹ PhD Candidate at the Centre for Disaster Studies, James Cook University, Australia

This study was funded and technical implemented by the SPC/GIZ Coping with Climate Change in the Pacific Island Region program in Vanuatu with the endorsement of the National Advisory Board on Climate Change and Disaster Risk Reduction.

How to cite this document: Vachette, A. 2014. Social Network Analysis Report. Part 2: Capitalisation of Capacities of Climate Change and Disaster Risk Organizations acting in Vanuatu. Secretariat of the Pacific Community (SPC) & Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ).

Acknowledgments: The author would like to thank the Vanuatu SPC/GIZ interns, Magrina Taribas, Melinda Lessa, Donnalyn Naviti and Onis Ben, who helped to collect data with local NGO and governmental agencies. The author is grateful to the NAB/PMU staff, Brian Philipps, Malcolm Dalesa, Rebecca Iaken, Florence Iautu and Lauren Stockbridge, who supported and advised her throughout the study. The author also would like to thank Christopher Bartlett (Technical Advisor of the Vanuatu SPC/GIZ CCCPIR), Daniel Vorbach, Danielle Roubin, Jennifer Worthington and Paolo Maloto (Oxfam Vanuatu), as well as Kati Corlew (East-West Centre) and Norbert Chan (University of Hong Kong) for their help, advice and comments during the conception of the survey. Overall, the author is greatly thankful to all stakeholders, who participated to the study and gave food for thought to the author during very interesting talks and meetings.

TABLE OF CONTENTS

| | |
|--|-----------|
| Acronyms and Abbreviations | 7 |
| Introduction | 9 |
| Most central stakeholders in whole-network connection level order | 11 |
| Principal stakeholders in information access order | 12 |
| Principal stakeholders in order of influence | 13 |
| Stakeholders capacities repartition by sector of expertise | 14 |
| 1. Integration of Climate Change and Disaster Risk stakeholders capacities | 14 |
| 1.1. Integration of Climate Change and Disaster Risk stakeholders in whole network Centrality order | 14 |
| 1.2. Integration of Climate Change and Disaster Risk stakeholders in information-access order | 14 |
| 1.3. Integration of Climate Change and Disaster Risk stakeholders in order of influence ability | 14 |
| 1.4. Integration of Climate Change and Disaster Risk stakeholders with capacities of capacity building | 15 |
| 1.5. Integration of Climate Change and Disaster Risk stakeholders with capacities of technical support | 15 |
| 1.6. Integration of Climate Change and Disaster Risk stakeholders with capacities of implementation support | 16 |
| 1.7. Integration of Climate Change and Disaster Risk stakeholders with capacities of political support | 16 |
| 1.8. Integration of Climate Change and Disaster Risk stakeholders with capacities of funding support | 16 |
| 1.9. Integration of Climate Change and Disaster Risk stakeholders with capacities of networking and linking stakeholders | 17 |
| 1.10. Integration of Climate Change and Disaster Risk stakeholders with capacities of informal advice | 17 |
| 2. Climate Change stakeholders capacities | 18 |
| 2.1. Climate Change stakeholders in whole network Centrality order..... | 18 |
| 2.2. Climate Change stakeholders in information-access order..... | 19 |
| 2.3. Climate Change stakeholders in order of influence ability | 19 |
| 2.4. Climate Change stakeholders with capacities of capacity building | 20 |
| 2.5. Climate Change stakeholders with capacities of technical support | 21 |
| 2.6. Climate Change stakeholders with capacities of implementation support | 22 |
| 2.7. Climate Change stakeholders with capacities of political support..... | 22 |
| 2.8. Climate Change stakeholders with capacities of funding support..... | 23 |
| 2.9. Climate Change stakeholders with capacities of networking and linking stakeholders | 24 |
| 2.10. Climate Change stakeholders with capacities of informal advice | 25 |
| 3. Disaster Risk stakeholders capacities | 26 |
| 3.1. Disaster Risk stakeholders in whole network Centrality order | 26 |
| 3.2. Disaster Risk stakeholders in information-access order | 27 |
| 3.3. Disaster Risk stakeholders in order of influence ability | 27 |
| 3.4. Disaster Risk stakeholders with capacities of capacity building..... | 27 |
| 3.5. Disaster Risk stakeholders with capacities of technical support..... | 28 |
| 3.6. Disaster Risk stakeholders with capacities of implementation support..... | 29 |
| 3.7. Disaster Risk stakeholders with capacities of political support | 29 |
| 3.8. Disaster Risk stakeholders with capacities of funding support..... | 30 |
| 3.9. Disaster Risk stakeholders with capacities of networking and linking stakeholders | 30 |
| 3.10. Disaster Risk stakeholders with capacities of informal advice | 31 |
| 4. Policy and Public Administration stakeholders capacities | 32 |
| 4.1. Policy and Public Administration stakeholders in whole network Centrality order | 32 |
| 4.2. Policy and Public Administration stakeholders in information-access order | 32 |
| 4.3. Policy and Public Administration stakeholders in order of influence ability..... | 32 |
| 4.4. Policy and Public Administration stakeholders with capacities of capacity building | 33 |
| 4.5. Policy and Public Administration stakeholders with capacities of technical support..... | 33 |
| 4.6. Policy and Public Administration stakeholders with capacities of implementation support..... | 34 |

Introduction

This report is a compilation and assessment of organizational capacities for disaster risk, climate change and sustainable development matters in Vanuatu.

This report is based on a social network analysis that was conducted in Vanuatu during three months in 2014 in order to understand the patterns of communication and collaboration for disaster risk reduction and climate change adaptation. This study revealed a general certain lack of awareness concerning who has which capacity in and outside of the country. It also revealed capacities of 260 stakeholders that have experience in Vanuatu and open high potential of collaboration. The author developed a methodology to help capitalising these capacities and offering a tool to easily know in which organisation staff with useful capacities work and where information could be found.

This report gathers individual capacities of 260 stakeholders in and outside of Vanuatu, who have experience and/or a link with the country, and thus, are potential collaborators for any future project. However, in a matter of anonymity and in order to avoid outdated of information with staff turn-over, names are not given, only organizations, where the stakeholders work, are listed.

In this report can be found useful information to answer to the following questions:

- I need someone with capacities that would help me to develop and implement a project, which organization should I approach?
- I need information on what is happening in Vanuatu, in the region or in the world within a certain sector (such as climate change adaptation, agriculture or gender), which organization would have such information?
- I have questions on a certain sector or concept; I wonder if someone has an answer?
- I would like to get capacities in a certain sector which organization could help me?

Three measures are considered throughout this report:

1. The in-degree: called "connection level" in this report. The in-degree measures how many people named the stakeholder as capacity holder.
2. The betweenness: called "information access" in this report. The betweenness measures the power the stakeholder has on information flow within the network by being on the path of the most direct link between other stakeholders.
3. The eigenvector: called "influence ability" in this report. The eigenvector measures the position of influence potential in the whole network by being connected to highly central members of the network. By being connected to highly central people, the stakeholder is potentially having lots of influence on all the indirectly linked members of the network.

The tools are organised by sectors:

- Integration of Climate Change and Disaster Risk
- Climate Change
- Disaster Risk
- Policy and public administration
- Meteorology and climate sciences
- Environment, biodiversity and forestry
- Agriculture, livestock and food security
- Marine resources and fisheries
- Water management
- Energy
- Health
- Community development
- Education
- Gender
- Traditional culture and knowledge management
- Program communication
- Communication and information management

- Planning
- Monitoring and Evaluation
- Logistics

For each sector:

- Three positions within the whole network are categorised:
 - the centrality of the stakeholder
 - stakeholders who have the most direct access to information
 - stakeholders who have a critical influential position because they are linked with highly central stakeholders

- Seven types of capacities are categorised:
 - Capacity building
 - Technical support
 - Implementation support
 - Political support/endorsement/approval
 - Funding support
 - Networking and linking stakeholders
 - Informal Advice

It is very important to understand that the listing does not mean that some stakeholders are more capable than others, but that more participants of the study ask them for help. Also, this report represents only 260 stakeholders, it is far from being comprehensive of capacities that exist in Vanuatu.

Further data collection needs to be done in all provinces in order to add provincial and community capacities to these results, which are mainly gathering individuals from Shefa Province.

This report aims to give a starting idea of how to organise and capitalise capacities repartition in Vanuatu. Updating of information in this report should be constant.

Most central stakeholders in whole-network connection level order

One's connection level is how often one is named by other people as a key collaborator for Climate Change Adaptation and Disaster Risk Reduction

| Connection level (top 10) | Stakeholders' organization | Location | Main sector of expertise |
|---------------------------|--|--|--|
| 1 | SPC-GIZ | Shefa | Policy and public administration |
| 2 | VMGD/PMU | Shefa | DRR/DRM/CCA |

Principal stakeholders in information access order

One's "information access centrality" measures how often one is acting as a bridge along the shortest link between two people of the network. (Linton Freeman)

| Position for information access | Stakeholders' organization | Location | Position for information access | Organization | Location |
|---------------------------------|---------------------------------|----------------|---------------------------------|---------------------------------------|----------------|
